

ENVIRONMENTAL SERVICES

Tectonic's staff of knowledgeable environmental engineers and scientists provide diversified expertise in environmental investigations, design, consulting and monitoring services for both public and private-sector clients. We serve our clients by reducing regulatory burden and providing a streamlined compliance effort to remain consistent with project requirements and facilitate efficient progress. To accomplish these goals, we offer a wide variety of services with the main objective of understanding the client needs, analyzing the regulatory framework and translating that to a clear plan of action that we follow through successful completion of the project.
